-------------	--------------	---------------------

*The SCO Group (voorheen Caldera) is marktleider op het gebied van Intel-based unix operating systems. De huidige generatie van SCO heeft de naam "OpenServer 5.06". SCO Unix is het besturingssysteem voor bedrijfskritische omgevingen, waarbij schaalbaarheid en stabiliteit als belangrijkste elementen gelden.*

**UNIXWARE 7.1.4**

*Description: UnixWare 7.1.4 is the most advanced deployment platform for industry standard Intel and AMD processor systems.*

*UnixWare 7.1.4 is the trusted foundation for solutions where proven scalability, reliability, security and affordability are critical.*

**UnixWare 7.1.4 OpenServer Kernel Personality (OKP) Licenses**

*The OKP add-on supports the installation of a full OpenServer application environment on UnixWare 7.1.4 including emulation support for*

*most Xenix applications in use with OpenServer today. The Lite version is a no-charge add-on which may be used to directly migrate an*

*existing OpenServer 5.0.4 through OpenServer 5.0.7 system along with already installed applications and data files. The Full version*

*provides a fresh OpenServer 5.0.7 image for installation on UnixWare 7.1.4. This option is a good choice for customers who want to*

*move a limited number of applications and also move to the latest release of OpenServer on UnixWare.*

#### Encryption Utilities

LA411-XX70	Netscape Strong Encryption Supplement	1 P	<b>37,00</b>
------------	---------------------------------------	-----	--------------

#### Clustering

ReliantHA is a clustering solution for enterprises requiring high levels of application and data availability. ReliantHA increases the overall

availability of applications and critical data by connecting multiple servers together as nodes within a single high-availability fail-over

cluster. Applications do not need to be aware of the operation of the cluster, and all nodes within the cluster may be used simultaneously
